THE
YATELEY
SOCIETY

IMPORTANT

THE 1989 AGM

THE AGM

- The 1989 AGM had to be postponed at the last minute as the Yateley Centre was closed because of the severe gales on the day. The revised date for the AGM is Thursday February 22, at 8:00pm in the Green Room.

Once again you are urged to come to the AGM, it gives you a chance to participate in Society business, to take part in the debate on resolutions, to learn more about the Society, and to meet other members. If you do not often come to meetings or events this is an opportunity to match faces to names, and to discover that the "Officers" and "Executive Committee" are just ordinary people like you!

A CHANGE OF SUBJECT FOR THE MARCH 21 TALK.

Unfortunately the original speaker for our March talk has been ill and has had to cancel her engagements during an extended recovery.

An alternative speaker and topic have been found, the details are:

"The Owlsmoor Bogs", a description of the natural history of this local wet area by Victoria Vassey.

The time and date are unchanged at 7:30 pm on Wednesday March 21st, the room will be Yateley Centre C.2.4. (C.2.4 is upstairs in C Block, a large and quite pleasant room with reasonable seating!)

THE 1990 PROGRAMME.

You may have noticed that so far the 1990 programme is a bit thin with not many meetings advertised. The reason is that we need to get the new Committee into action, we hope with new ideas, but of course it has not been elected yet!

Nevertheless there are some things afoot and a couple more advanced notices, plus some Conservation activities, appear on the programme page overleaf.

Those of us who came to the talk by Les Jones on "The Water Industry and The Environment" had a very interesting evening. The problems facing the water suppliers are many and the quality requirements are claimed to be very strict. The formation of the National Rivers Authority, for whom Les Jones is the Thames Area General Manager, should ensure that the river water on which so many people depend for their supply is protected from pollution, so that the Water Boards can safely extract and purify the water and supply it to the users.
